Representation

Instructions for use

This test report serves to demonstrate the airborne sound insulation of a building component.

For Germany the following applies: The weighted sound reduction index Rw can be used for the prognosis of the sound insulation of windows according to DIN 4109-35:2016.

Validity

The data and results given relate solely to the tested and described specimen.

Testing the sound insulation does not allow any statement to be made on any further characteristics of the present construction regarding performance and quality.
